

We demand that the British Government issues through its Treasury debt-free and interest-free moneyas it did in 1914!

Overview of our country's current 'debt' situation:

Now, if there is one thing that unites the ordinary decent people of our country, it is the mutual loathing that we all now have for the private bankers and their **political puppets sitting in Westminster**. The former openly commit fraud and then pay themselves **huge bonuses** whilst the latter pass legislation to destroy the sovereignty of our nation and then believe they are entitled to a thirty per cent pay increase. **And whilst all this is going on, a gigantic lie that affects all of us is being allowed to continue unchallenged!**

We are told almost on a daily basis, by a compliant and largely controlled corporate media, that the **world is drowning in a sea of debt**. They tell us that the Eurozone is on the edge and we can certainly see that countries like Spain, Portugal, Ireland and Greece are in social meltdown as their spineless and corrupt politicians meekly surrender the people's sovereignty, potential and wealth to the bankers and their corporate cohorts. **We are told that the National Debt in the USA is now well over \$15 trillion and is virtually unsustainable, whilst here in the UK it is now over £1 trillion.**

As our debts mount up, **Cameron and Clegg, with that other puppet Milliband**, **repeatedly tell us that severe austerity measures cannot be avoided as our country borrows £100 billion a year from the bankers in the City of London**. "The Deficit must be tackled", they all parrot together. These loans, they believe, must be honoured even if it means distressing our armed forces to the point that they can no longer guarantee the defence of our nation. The bankers must be repaid, they tell us, even if it means cutting back on essential services for our pensioners, our children and the other vulnerable sections in our society. The 'City' must be allowed to prevail, they argue, even if it means selling off our key infrastructure and industries to overseas buyers. To put it very bluntly, our country is being systematically pillaged of its wealth, security and sovereignty just to keep the money markets happy and the obscene City bonuses coming in.

The Solution:

But hold on a moment! Let's just analyse what is actually going on here. Let's ask some really pertinent questions that the bankers and politicians will run a mile from answering. Let's see where the truth really lies! For starters, let's ask this common sense question that gets bankers, economists and their compliant politicians running for cover:

Why can't the British government through its Treasury issue debt free and interest free money based upon the common wealth, potential and integrity of this country - worth trillions - why do our politicians go straight to the private bankers who simply create money completely out of thin air....just figures on a computer screen....and when this 'money', or more accurately this 'nothingness', is received by our government, we, as taxpayers, start paying the exorbitant interest which is currently costing the British people in real money at least £125,000,000 a day, or more than £44,000,000,000 a year?

The truth is that all of this debt has been arrived at unlawfully by the use of stealth and deception on the part of the corporate elite based in the City of London, led by the leading dynastic banking families. Over the last 300 years or more, they have created for themselves a worldwide network of Central Banks including the Bank of England and the Federal Reserve. These banks are responsible for issuing the money supply of their respective countries with debt-based money using 'fractional reserve lending'. "Permit me to issue and control the money of a nation, and I care not who makes its laws", was the proud boast of Mayer Amschel Rothschild.

To achieve this control over the world's money supply, the political process of the world has gradually been hijacked by the private debt-creating bankers. Above our elected representatives, we have a network of secretive so-called 'think tanks' (such as the Bilderberg Group) where powerful and influential people meet behind closed doors to discuss in private the global economy and the political direction of the world. This is FACT, not some crackpot conspiracy theory. Their ultimate aim is to seek global governance on their terms by gradually breaking down the sovereignty of individual nations in favour of a new supremacy of big business and private banking (the European Union superstate being an important player in this strategy). This corporate takeover can only be achieved if compliant and treasonous politicians continue playing the game of agreeing to allow their countries to be sucked even further into debt servitude to these unaccountable corporate bodies.

One such body is the Bank for International Settlements based in Basel in Switzerland. This little known, secretive and unaccountable organisation effectively controls the money supply of the world - it is the Central Bank for the Central Banks. Along with the City of London, this is the power base that drives and steers the agenda of the corporate globalists. Please take the time and read these three comprehensive articles that will clarify the enormous criminality being practiced against all of us.

<http://theeconomiccollapseblog.com/archives/who-controls-the-money-an-unelected-unaccountable-central-bank-of-the-world-secretly-does>

http://www.bibliotecapleyades.net/sociopolitica/sociopol_globalbanking04.htm

<http://anticorruptionsociety.com/international/the-city-world-conquest/>

Please be aware that there are monetary reform campaign groups already in existence but they are too tied up with the economic system to see the real solution that is needed. One such is 'Positive Money' where the key activists, whilst recognising that banks create money out of thin air and then charge interest and that this absurdity must end, believe that the Bank of England, the City of London and the Bank for International Settlements are largely benign institutions that can be trusted. Those of us who know the much bigger picture realise that they have a lot of catching up to do!

Today's human race has very largely been put on a corporate treadmill of mass mindless production set up to meet the false corporate inspired 'needs' of mass mindless consumerism. And if that wasn't enough, we have corporate-led sport and corporate-led media and entertainment to help keep the over-whelming majority distracted from ever finding out the truth about the present human condition. Enough is enough - this corporate-led Orwellian attack upon humanity can come to an end by the taking of one simple action.....and it is up to all of us now to stand up and to demand that our political servants take that action!

As happened at the outbreak of the First World War in August 1914, we demand that the British Government immediately starts issuing debt-free and interest-free money through Her Majesty's Treasury. Based on the wealth, integrity and potential of our country, such an initiative would meet the security, needs and happiness of the British people whilst setting in

motion the complete removal of the power that bankers have over humanity. It is game up for the banking elite! Please read this article here which proves historically that such an act is both feasible and lawful. <http://www.thebcgroup.org.uk/article/bankers-bradburys-carnage-and-slaughter-western-front>.

What follows next is a Prerogative Writ of Mandamus sent to David Cameron and George Osborne on February 11th (with copies sent to Nick Clegg and Edward Milliband) which demands that the Treasury begins to issue its own debt-free and interest-free money to meet the security, well-being and happiness of the British people:

Prerogative Writ of Mandamus

A Writ of Mandamus is issued from a court of superior jurisdiction that commands an inferior tribunal, corporation, Municipal Corporation, or individual to perform, or refrain from performing, a particular act, the performance or omission of which is required by law as an obligation.

It is a Writ that orders a public agency or governmental body to perform an act required by law when it has neglected or refused to do so.

WE, THE PEOPLE, have constituted the Highest Court in the Land since the year Twelve Hundred and Fifteen (1215), and this can be seen by virtue of the fact that we have judged those whom we choose to be our Public Servants, for many centuries, via the Electoral Process. If it is our Prerogative to determine our Public Servants, then it must be our Prerogative to tell them how we Wish to governed.

This Writ of Mandamus is thus the Wish of Us, the Sovereigns who constitute the Peaceful Inhabitants of the land-masses known as England, Scotland, Wales and Northern Ireland. As such, WE, THE AUTHORS of this Writ, are therefore the AUTHOR(WR)ITIES in this matter.

This Writ is, therefore, a Command that our Elected Servants take the necessary actions (which they have hitherto neglected to take), to restore the happiness and prosperity of those collective Nations listed above, by immediately implementing Schedules to the requirements defined in the attached letter to the Rt. Hon. David Cameron MP, Prime Minister and First Lord of the Treasury, and the Rt. Hon. George Osborne MP, Chancellor of the Exchequer.

Signed and sealed, for and on behalf of, those SOVEREIGNS in the attached list, by

Veronica

11th February 2013

To the Rt. Hon. David Cameron MP, Prime Minister and First Lord of the Treasury, and the Rt. Hon. George Osborne MP, Chancellor of the Exchequer.

Sirs,

We are writing to you not as our political leaders but as our elected servants in government who are duty bound by oath of office to uphold the Law of the Land as inserted into Magna Carta 1215 and to protect our ancient sovereignty from foreign intrusion.

Please also understand that this is not a polite request - this is a lawful demand to bring to an immediate end Her Majesty's Government's involvement with the unlawful debt-creating banking system that is currently endangering the future well-being, happiness and sovereignty of the British nation.

What follows are historical and provable facts. Failure by yourselves to immediately carry out this lawful demand and to redress our legitimate grievance will leave you both vulnerable to lawful arrests by the British people on the charge of treason.

Detailed research has now exposed that unlawful activities are being undertaken by Her Majesty's Government at the behest of a corrupt and fraudulent international banking cartel.

Led by the world's elite banking families, this unlawful cabal operates through a shadowy network of high level and secretive 'think tanks' (including the Bilderberg Group which you are both very familiar with) as well as quasi international conferences where unashamed globalist

agenda are displayed in such a way by a compliant mainstream media as to gain public acceptance by hiding the real truth.

One such long term criminal agendum is the eventual creation of a European Union superstate by the use of stealth, deception and massive unlawful debt. To succeed here must result in the obvious demise of the United Kingdom as a sovereign nation and any involvement by British politicians with such an agendum has to be seen, **under our ancient and tested Common Law, as a clear case of treason.**

But the real treason currently being carried out on the British people by Her Majesty's Government involves the **nation's money supply**. The crippling debt burden that is currently shaping the fiscal policies and strategies of our nation has been arrived at by unlawful means. The so-called 'Deficit' and 'National Debt', which are causing increasing misery for law abiding families and businesses, not to mention putting at risk our nation's defences, only exist as a direct result of allowing the private banks to be involved in our nation's money supply.

As you both know only too well, the private banking corporations, with the gold standard no longer applicable, create money completely out of thin air - just numbers on a computer screen, using so-called 'fractional reserve lending'. **Once this 'nothingness' has been transferred over to Her Majesty's Treasury, we, the poor taxpayers, have to pay real and earned money to meet the repayments not to mention the interest on this 'nothingness'. It is also a simple fact that the private banks create absolutely nothing to cover the interest demanded thus adding to the nation's ever-increasing debt burden - it becomes a simple case of robbing 'Peter' to pay 'Paul'. This all has to be viewed, not as clever economics, but as a clear case of fraud under Common Law.**

The increasing austerity measures being undertaken by Her Majesty's Government, along with the highly invasive and **complex taxation system** needed to raise 'real' money to pay back the bankers' 'nothingness', is creating a country that is now becoming increasingly subservient to debt and fear. However, there is one simple action that you can both take that will reverse our nation's financial misfortunes overnight.....and there are two historical precedents to prove it can be done!

From reliable inside sources, we now know the full truth about money supply. 'Money' is simply a convenient unit of exchange for goods and services that people have complete confidence in. Contrary to what the private bankers and the Bank of England (and its controller, the Bank for International Settlements) would have you believe, any sovereign nation has the lawful and moral right to issue through its treasury its own debt-free and interest-free money based on nothing more than the wealth, integrity and potential of that nation. Private debt-creating banking and central banks have absolutely no place in the lawful creation and issuance of a country's money supply.

This being the case, we now wish to draw to your attention these two historical precedents which give absolute credence to this fiscal principle of national credit. In other words, there is nothing whatsoever to stop Her Majesty's Treasury from being able to issue debt-free and interest-free treasury notes for the well-being, security and happiness of the British people.

The first precedent comes from America. At the height of the American Civil War, the US Treasury warned President Lincoln that further funding would be needed if the Federal North was to have the resources needed to defeat the Confederate South. The President initially went to the private banks who wanted between 24 and 36 per cent interest. Lincoln knew that if he agreed to take the loans from the bankers that he would be putting his country into a debt noose that would strangle the economic prosperity out of his country and which would almost be impossible to pay off.

On the advice of a businessman with proven integrity, Colonel Dick Taylor from Illinois, Abraham Lincoln then made the momentous and lawful decision to print debt-free and interest-free paper money based on nothing more than the honour of the American Government. Called 'Greenbacks' because they were coloured green on one side only, the US Treasury issued 450 million dollars worth of these notes and they were immediately accepted as legal tender by a willing and grateful nation. The war was eventually won and this very popular new paper currency seemed set to continue. However, with the assassination of Lincoln just after the end of hostilities, his Greenback legacy sadly died with him as the private bankers managed to 'persuade' Congress to revoke this successful initiative in favour of the debt-creating National Banking Act which eventually led to the formation of the privately run Federal Reserve in 1913. Since then, America's unlawful debt has risen to over 15 trillion dollars.

The second precedent is much closer to home. At the outbreak of the First World War, the Bank of England and the private bankers, fearing that people would rush to withdraw their money thus setting in motion a run on the banks, went to see Lloyd George, the then Chancellor of the Exchequer. He quickly rushed through the Currency and Bank Notes Act 1914 which allowed His Majesty's Treasury to immediately start issuing debt-free treasury notes based on the credit worthiness of the country. Having extended the August 3rd Bank Holiday by a further three days, the banks reopened for business on August 7th with these new treasury notes being immediately accepted as legitimate money by the British people. The next few months saw some £300 million of these 'Bradbury' treasury notes being printed thus effectively averting any possible financial crisis as Britain mobilised for the struggle ahead.

However, the private bankers, realising that these debt-free Bradburys would prevent them from making obscene profits from this terrible war,

'persuaded' Lloyd George to agree to phase out the debt-free treasury notes in favour of returning to the more conventional loans from the banks whereby interest would be added. The result of this 'about turn' in favour of the bankers was to see Britain's National Debt go up from £650 million in 1914 to a staggering £7,500 million in 1919.

Please read this article here at:

<http://www.thebcgroup.org.uk/article/bankers-bradburys-carnage-and-slaughter-western-front>

So there we have it! Our demand is simple and direct. There is absolutely nothing to stop you, David Cameron, and you, George Osborne, from creating a 21st century 'Bradbury' Treasury note based upon the wealth, integrity and potential of the British nation - indeed, according to the Office of National Statistics in 2010, our Human Capital alone is estimated at £17.12 trillion! This one action would immediately restore Britain's sovereignty, economy and industries not to mention the well-being, security and happiness of the British people. As regards the Deficit and the National Debt, these will be taken care of by our ancient and tested Common Law - a jury will decide as to their lawfulness and if both were deemed to have been arrived at by unlawful means, then they will be declared null and void. The same applies to our membership of the European Union. If a jury decides that our original membership of the EEC was arrived at by the use of deliberate deception, as many believe it was, then our membership must be declared null and void resulting in immediate withdrawal with no referendum being required.

In conclusion, may we please remind you again that this is not a letter inviting further debate - it is a demand for immediate remedy and redress. Failure to comply with this lawful demand to remove the British economy from the clutches of the criminal bankers by restoring our sovereign right to issue our own debt-free money will leave you both open to the charge of treason. People are now waking up to what is really going on and we have lost patience with the criminality and treason currently being practised by our elected servants in Parliament as they continue to distress our country's sovereignty and ability to defend itself.

As a lawful demand, and in recognition of Article 61 of Magna Carta 1215, we, the undersigned, will now allow you a period of forty days from the date of this letter to make the necessary arrangements within Her Majesty's Treasury in order to create a new sovereign, debt-free money supply based on the wealth, integrity and potential of our nation to meet the future security, well-being and happiness of the British people.

Iceland has already stood up to the bankers - now it is our turn!

Yours sincerely

Roger Hayes Chairman of the British Constitution Group
